

Hitachi Air Conditioning Systems Co., Ltd.

URL: http://www.hitachiacs.co.jp

Specifications in this catalogue are subject to change without notice in order that HITACHI may bring the latest innovations to their customers.

Distributed By:

compressor with a cyclone oil separator, Hitachi's unique

technology. Many industrial applications are possible due to

precise control of water temperature and wide range of operation.

Energy saving

Environmentally considerate

High efficiency

High reliability

Easy installation

Many applications

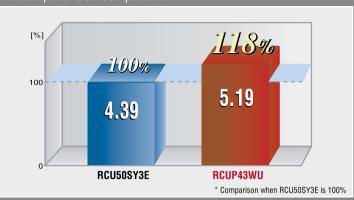

### Energy saving with high efficiency

COP is 5.19 on RCUP43WU of the new series, in increase of 18% from RCU50SY3E of the conventional series.

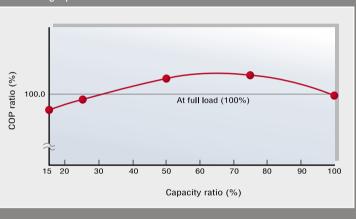

### Industry-leading partial load properties

High COP is possible even at minimum load.

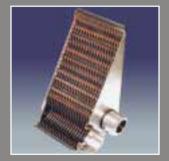

### Plate heat exchangers

Hitachi uses less refrigerant to help protect the environment, such as by using plate heat exchangers.

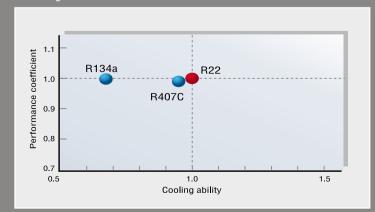

### Hitachi uses R407C

As shown in the drawing , refrigerant R22 and R407C deliver similar cooling performance. The use of R407C makes the size more compact than R134a

#### ■ Refrigerant and COP

# A simple structured high-performance new twin screw compressor

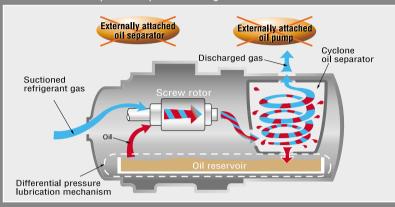

Hitachi's new screw compressor has the following features:

- Oil carry-out ratio is by less than 1% due to cyclone oil separator.
- Working range is extended by 15%.
- The number of parts is reduced to 1/10 of the reciprocating compressor.

■ New screw compressor operation image

### Low vibration

No exclusive vibration control equipment is necessary due to the low-vibration screw compressor.

#### Vibration comparison

— 1.3.4.6 55									
Ту	pe	Reciprocating	Screw						
Comp. speed (rpm) 50/60Hz		1,430/1,720	2,880/3,470						
Full amplitude	At leg of comp.	20-30	5-8						
	At base frame	20	Less than 10						
Vib. frequecy	At leg of comp.	23.8/28.7	48.5/57.8						
	At base frame	23.8/28.7	48/57.8						
Acceleration energy		Screw: 1/5 of reciprocating type							

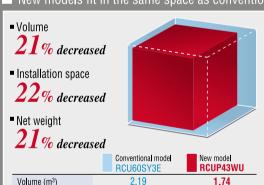

1.14

765

### Compact and light

As shown in the drawing on the right, the volume, installation space and weight are all reduced, making installation easy.

### New models fit in the same space as conventional models

### £111177

### Decreased holding water quantity

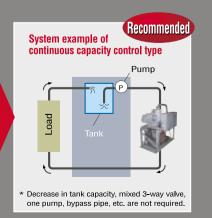

As Hitachi's new type of water-cooled chiller holds less water, so fewer facilities are necessary.

Installation space (m2)

Net weight (kg)

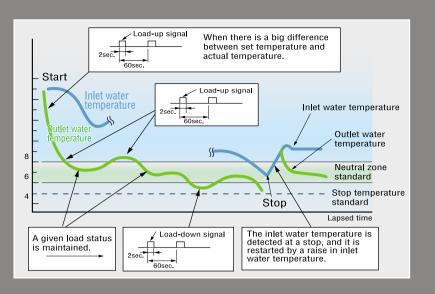

### 29

### Continuous capacity control

The temperature of the chilled water outlet can be kept at the set temperature  $\pm 1^{\circ}$ C by continuous capacity control, so it is suitable for industrial use.

## 7

### Many applications

Hitachi uses Building Management System through LonWorks. For chiller airconditioning, Hitachi provides its own central station system.

Simply connect chiller and LonWorks<sup>®</sup> via a HARC70-CE. No complicated work is necessary.

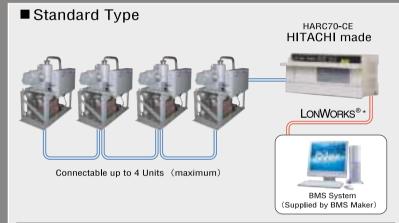

Hitachi's CSC-5S central station system newly developed for the Hitachi screw chiller provides monitoring as well as individual and

CSC-5S

quantity control. It can control up to 8 chillers and be installed according to the customer's air-conditioning environment needs. Unlike conventional machines, the functions can be checked from the control room via remote control, thus reducing the need to visit the machine room for manual checking.

1. The nominal cooling capacities are based on the following conditions.

Temperature Conditions

Chilled Water Inlet Temperature: 12°C Condenser Water Inlet Temperature: 30°C Chilled Water Outlet Temperature: 7°C Condenser Water Outlet Temperature: 35°C

2. Applicable Power Supplies

Main Power Source (3φ): 220V 60Hz, 380V 50Hz, 415V 50Hz

Control (1φ): 220V 60Hz, 220V 50Hz, 240V 50Hz

3. Working Range Condenser Water Outlet Temperature : Condenser Water Temperature Difference : Chilled Water Outlet Temperature : Chilled Water Temperature Difference :

22°C to 37°C 3.5°C to 10°C at 50Hz, 4.2°C to 10°C at 60Hz

5°C to 20°C 2.5°C to 10°C at 50Hz, 3.0°C to 10°C at 60Hz

4. The common chilled water piping (filed-supplied) between each water cooler shall be connected directly at site.

The water coolers in the same unit shall be connected to the same common piping.

- 5. Provide a 20 mesh water strainer at the chilled and condenser water inlet. The 20 mesh strainer is available by Hitachi as an optional accessory.
- 7. Specifications in the above table are subject to change without notice in order that Hitachi may bring the latest innovations their customers.
